

Label printing functionality that has been developed in line with fruit industry and GSI standards.

BENEFITS

- Cost savings as a result of:
 - Reduced stock holding of preprinted stationary, thereby reducing the risk of unusable stock due to layout or seasonal changes.
 - Overall cost of system generated consolidated labels are lower than preprinted stationary.
- Ability to source blank labels from a wider variety of suppliers
- The labels conform to industry standards
- Direct control over the quality of the labels generated
- The ability to customise the labels to satisfy specific requirements
- It forms part of the PALTRACK™ solution built on one database and one operating system which eases information exchange

KEY FEATURES

PALLET LABEL GENERATION

The software generates and prints pallet labels for local and export usage. The number ranges supplied by GSI or PPECB is maintained and used by the solution to ensure label uniqueness across the logistical chain. The entire label can be printed on a blank label, or preprinted labels can be used where the pallet ID has already been generated and preprinted.

CARTON LABEL GENERATION

The software generates carton labels for export according to the requirements and standards of the various export markets.

PUNNET LABEL GENERATION

The software generates punnet labels for the local and export markets.

THRIFT BAG LABEL GENERATION

The software generates thrift bag labels for the local and export markets.
